

## Provider-Based Billing Notice

OSS Health is a **provider-based system**. This means that all of our services are offered as a department of OSS Hospital. You are in a **provider-based facility** if you receive services at:

OSS Health Powder Mill  
OSS Health Urgent Care  
OSS Health Hanover

OSS Health Mechanicsburg  
OSS Health Pain Center  
OSS Health Foot & Ankle Specialists

**PROVIDER-BASED** is a billing process used when you go to any OSS Health location listed above. These places are known as **provider-based facilities**. There are national rules that OSS Health follows to bill patients because the hospital owns, operates, and bills for all *facility* and *physician* charges.

**BILLING:** If you are covered by Medicare and certain other insurance companies, you will see an additional facility charge for a hospital outpatient visit on your bill. You will also see a physician charge to reflect the professional services provided to you by our provider. You will also be billed for other services that your physician orders, such as x-rays. Medicare will cover both the facility and physician fees and pay your claim minus any deductibles or coinsurance that may be your responsibility.

**COINSURANCE:** Coinsurance is the percentage of your health care charges you are expected to pay when you get medical care. For example, under Medicare Part B, you will usually be expected to pay 20% of the allowable charges after you've met your deductible. For many insurances, including Medicare, you will be responsible for coinsurance on both the facility and physician charges of the provider-based visit.

**DEDUCTIBLE:** A deductible is the amount you pay for covered health care services before Medicare and other health insurances start to pay. Being cared for at a provider-based facility **should not** increase your annual deductible; however, your health insurance may require that you pay a portion of your annual deductible on both the facility and professional charges of your visit. If you have secondary insurance coverage, it **may** provide coverage for coinsurance and deductibles you are expected to pay. OSS Health will bill your secondary insurance for any coinsurance or deductible amounts if you have secondary insurance. Any unpaid money that is due will be billed to you.

**ESTIMATED COINSURANCE:** Below are **examples** of coinsurance amounts that could be billed to you or your secondary insurance for covered services that you receive at one of our provider-based locations. These examples are based on a person with Medicare insurance. It does not reflect any other coinsurance that you may have for other services such as braces, orthotics, injections, etc.

**NOTE: These are examples. Your actual bill could be different.**

### Existing OSS Health patient:

Hospital Facility Visit:	\$21.04
X-Ray of Knee	\$2.25
Physician Level 3 Exam	\$10.15
Total you pay	\$33.44

### New OSS Health patient:

Hospital Facility Visit:	\$21.04
X-Ray of Shoulder	\$1.90
X-Ray of Wrist	\$1.69
Physician Level 4 Exam	\$25.87
Total you pay	\$50.50

**The actual amount of your actual bill WILL be different from the above estimates.** Your bill is based on the actual services you receive. Medicare or other insurance companies determine the final amount you are billed. If you have **Billing Questions**, please call **717-747-8307**
